

# Cold Weather Kits

## Battery Warmer

### DESCRIPTION

The Cold Weather Kit consists of a battery warmer that has a thermostat built into the battery wrap. When temperatures fall below an acceptable level, the thermostat activates the battery warmer maintaining optimum battery temperature for the best generator starting. These kits are recommended for generators installed in regions where the temperature regularly falls below 32 degrees Fahrenheit.

When installing a cold weather kit, it is required that the oil is replaced with 5W-30 synthetic for better engine start capability.

Cold Weather Kit	Description/Applicable Sizes	Use with Extreme Cold Weather Kit	Voltage	Watts	Amps
5630	2.4L 25/35/60kW	5616	120	50	.41
5632	5.4L 45kW	6204	120	80	.67
5632	4.6L 80kW	5619			
5632	6.8L 70kW	5620			
5632	6.8L 150kW	5667			
5633	6.8L 100kW & 130kW	5620
